— BOARD STRENGTHS

Pick the ply. We build the box around it.

Every ply adds a fluted layer between flat liners. More layers means more stacking strength and more protection in transit.

The everyday box

2 LINERS • 1 FLUTE

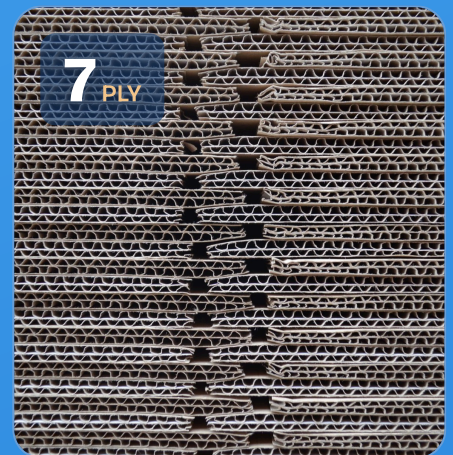

Lightweight cartons for general packing, storage and routine dispatch.

Balanced strength

3 LINERS • 2 FLUTES

For heavier goods, taller stacking and regular commercial movement.

Maximum protection

4 LINERS • 3 FLUTES

For demanding products, large formats and rough handling.

BOARD	STRUCTURE	TYPICAL USE	BOARD COLOUR
3-ply	Liner · flute · liner	Light goods, e-commerce, storage, routine dispatch	Brown or white
5-ply	Liner · flute · liner · flute · liner	Medium and heavy goods, stacked pallets, commercial supply	Brown or white
7-ply	Four liners with three flute layers	Heavy or fragile products, large formats, long-distance transit	Brown or white

SIZES

Any dimension

Cut to your product on our die machine. No minimum standard size.

PRINTING

Your brand on the box

Client-specific printing on white or brown board, matched to your artwork.

JOINING

Iron or copper pin

Stitched closure for a firm, lasting seam that survives stacking and transit.

— PLANT & PROCESS

Semi-automatic production, disciplined every day.

01

Requirement

Size, ply, print and delivery date fixed before production planning.

02

Board selection

White or brown board in 3, 5 or 7 ply, chosen for your product's weight.

03

Production

Corrugation, die sizing, stitching and finishing on our own line.

04

Dispatch

Stacked, wrapped and delivered in covered-body vehicles.

— DELIVERY PROMISE

7-10

days from confirmed order to delivery.

Any

size manufactured to your application.

2

pin options: copper or iron, as you prefer.

NCR

wide supply in covered-body vehicles, protected from dust, rain and sun.
